

# Hospitality Hygiene 10

We have made a commitment to our employees and guests to follow these 10 best practices heading forward in all of our operations. We have a commitment to not only the excellent standards that we have built this company on, but also an unwavering commitment to the new standard of hygiene set forward by our leaders.

## **1 Employee Wellness Checks.**

We commit to daily employee wellness checks with health surveys and employee temperature logs. Any employee exhibiting symptoms of elevated body temperature or excessive coughing and sneezing will be prohibited from work for 72 hours and until symptoms disappear. They will be allowed to return to work with authorized medical approval.

## **2 Mandatory Protective Wear.**

Employees required to wear gloves and protective masks during operations

## **3 Reservations Required.**

Designated reservation time slots to ensure minimal guest interaction.

## **4 Reduced Party Sizes.**

Party sizes limited to 6 or less

## **5 Table Spacing.**

Restaurant Floor Plans designed for table spacing according to governmental and CDC guidelines that promote social distancing. "6 Feet Means 6 Feet"

## **6 Increase of Sanitization.**

All common areas and Kitchen Surfaces sanitized and cleaned on the hour every hour within operations

## **7 Digital & Disposable Menus.**

Use of virtual menus posted on designated sites and/or disposable – one use menus

## **8 Designated Sanitation Stations.**

Front doorway entry, restroom entry, & employee designated kitchen entry

## **9 Disease Prevention and Sanitation Training.**

Employee education on spread of bacteria and viral pathogens and how to prevent based on CDC guidelines. Increased training as it comes to the value of handwashing and sanitation and its effect to control the spread of disease.

## **10 Caring Operational Strategies.**

Focusing on the health and safety of our guests and employees within the construct that make Atlas Restaurant Group the greatest Hospitality Entertainment Company in the region

# PROTECT YOURSELF & OTHERS FROM COVID-19:

## Know about COVID-19

- Coronavirus (COVID-19) is an illness caused by a virus that can spread from person to person.
- The virus that causes COVID-19 is a new coronavirus that has spread throughout the world.
- COVID-19 symptoms can range from mild (or no symptoms) to severe illness.

## Know how COVID-19 is Spread

- You can become infected by coming into close contact (about 6 feet or two arm lengths) with a person who has COVID-19.

## COVID-19 is primarily spread from person to person.

- You can become infected from respiratory droplets when an infected person coughs, sneezes, or talks.
- You may also be able to get it by touching a surface or object that has the virus on it, and then by touching your mouth, nose, or eyes.

## Protect yourself and others from COVID-19

- There is currently no vaccine to protect against COVID-19. The best way to protect yourself is to avoid being exposed to the virus that causes COVID-19.
- Stay home as much as possible and avoid close contact with others.
- Wear a cloth face covering that covers your nose and mouth in public settings.
- Clean & disinfect frequently touched surfaces.

- Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol.

## Practice social distancing

- Buy groceries and medicine, go to the doctor, and complete banking activities online when possible.
- If you must go in person, stay at least 6 feet away from others and disinfect items you must touch.
- Get deliveries and takeout, and limit in-person contact as much as possible.

## Prevent the spread of COVID-19 if you are sick

- Stay home if you are sick, except to get medical care.
- Avoid public transportation, ride-sharing, or taxis.
- Separate yourself from other people and pets in your home.
- There is no specific treatment for COVID-19, but you can seek medical care to help relieve your symptoms.
- If you need medical attention, call ahead.

## Know your risk for severe illness

- Everyone is at risk of getting COVID-19.
- Older adults and people of any age who have serious underlying medical conditions may be at higher risk for more severe illness.
